

Kiosk Pre-configuration

NOTES:

1. Invoke the Kiosk module

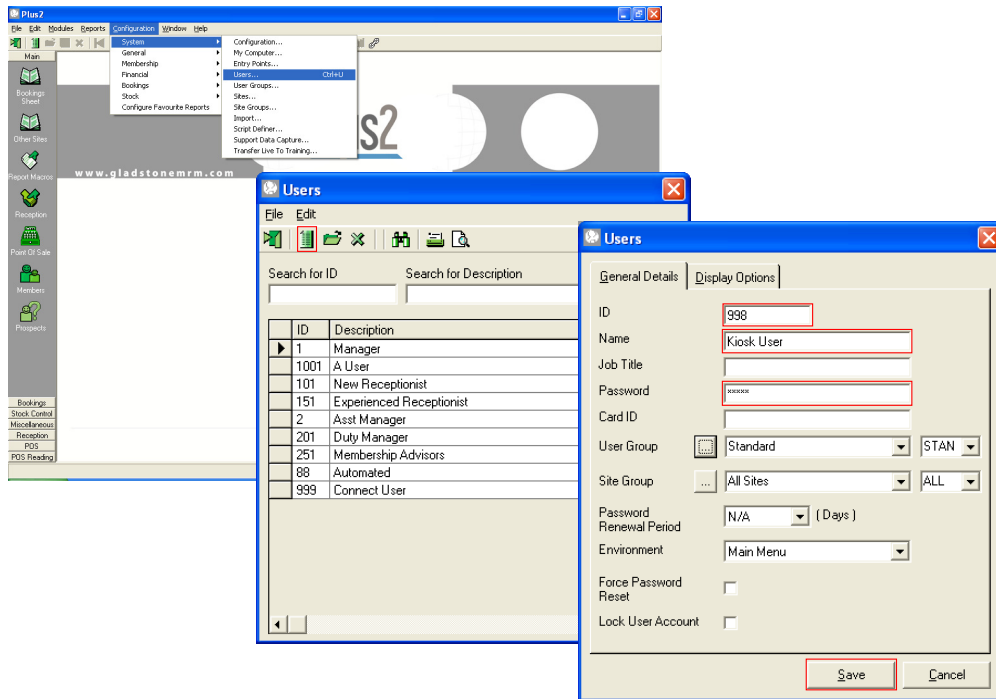

NOTES:

The 'Kiosk' module in Plus2 system configuration needs to be invoked.

- Choose the menu option 'Configuration', select 'System' and click on 'Configuration'.
- Expand the option of 'Modules'.
- Double click the option of 'Kiosk module'.
- You are prompted for a system password, which can be obtained from Gladstone Customer Support Desk (08451 20 10 11).
- Click in the check box to invoke the modules and select the option of 'Save'.
- The kiosk module is invoked and a new grouping of 'Kiosk' is available within system configuration.
- Select the toolbar option of 'Exit'.

2. Configure a Kiosk user

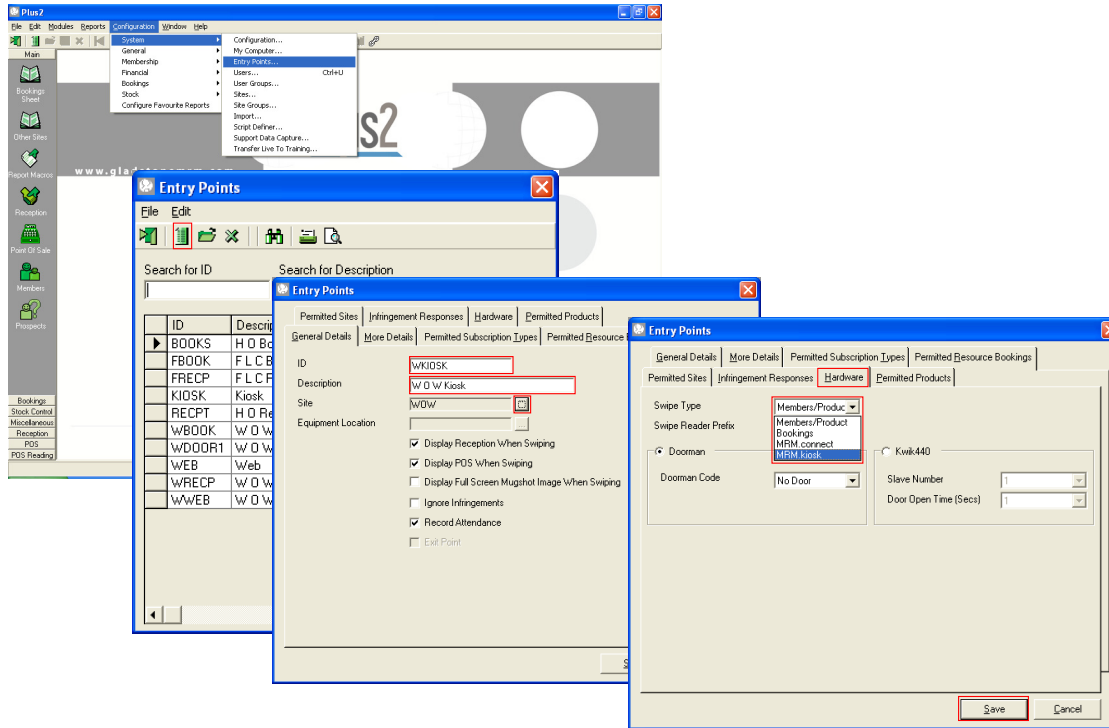

NOTES:

A new user needs to be created and will be attributed to all sales that are generated through the Kiosk.

- Choose the menu option of 'Configuration', select 'System' and click on 'User'.
- Click on the toolbar option of 'New'.
- Define a unique 'ID'
- Define a 'Description'
- It is advisable to define a password to secure login to Plus2 as this user.
- Click on 'Save' and you return to the list of users.
- Select the toolbar option of 'Exit'.

3. Configure a Kiosk entry point

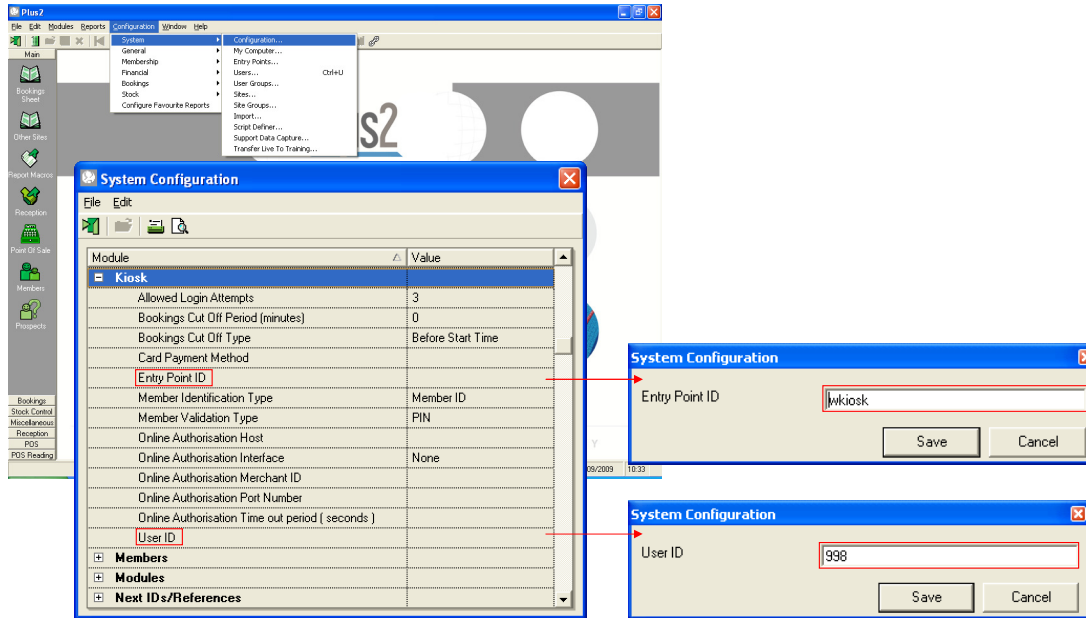

NOTES:

A new entry point per site will need to be created where Kiosk has been installed.
 The entry point will control the variety of infringement response checks that can be configured.

- Choose the menu option of 'Configuration', select 'System' and click on 'Entry Points'.
- Click on the toolbar option of 'New'.
- Define a unique 'ID'.
- Define a 'Description'.
- Select the option 'Sites' and select the site for the new entry point.
- Double click to choose the site.
- Select the 'Hardware' tab.
- Click the dropdown list of 'Swipe Type' and choose 'MRM.Kiosk'
- Click the option 'Save' and you return to the list of entry points.
- Select the toolbar option of 'Exit'.

4. Configure Kiosk system configuration

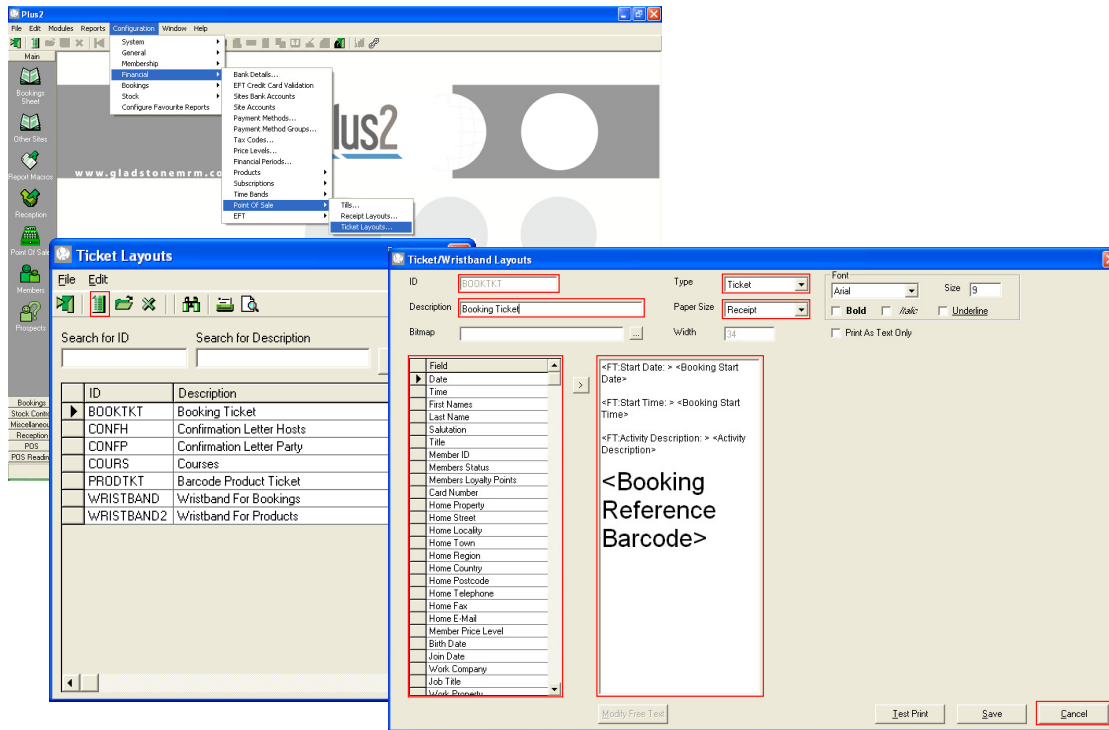

NOTES:

Configuration within Plus2 system configuration needs to be modified and apply the new configuration that has been created since invoking the Kiosk module.

- Choose the menu option 'Configuration', select 'System', 'Configuration'.
- Expand the option of 'Kiosk'.
- Double click to modify the option of 'Entry Point ID'.
- Enter the Entry Point ID previously created for the site and select the option 'Save'.
- Double click to modify the option of 'User ID'.
- Enter the User ID previously created and select the option 'Save'.
- Select the toolbar option of 'Exit'.

5. Configure ticket layouts

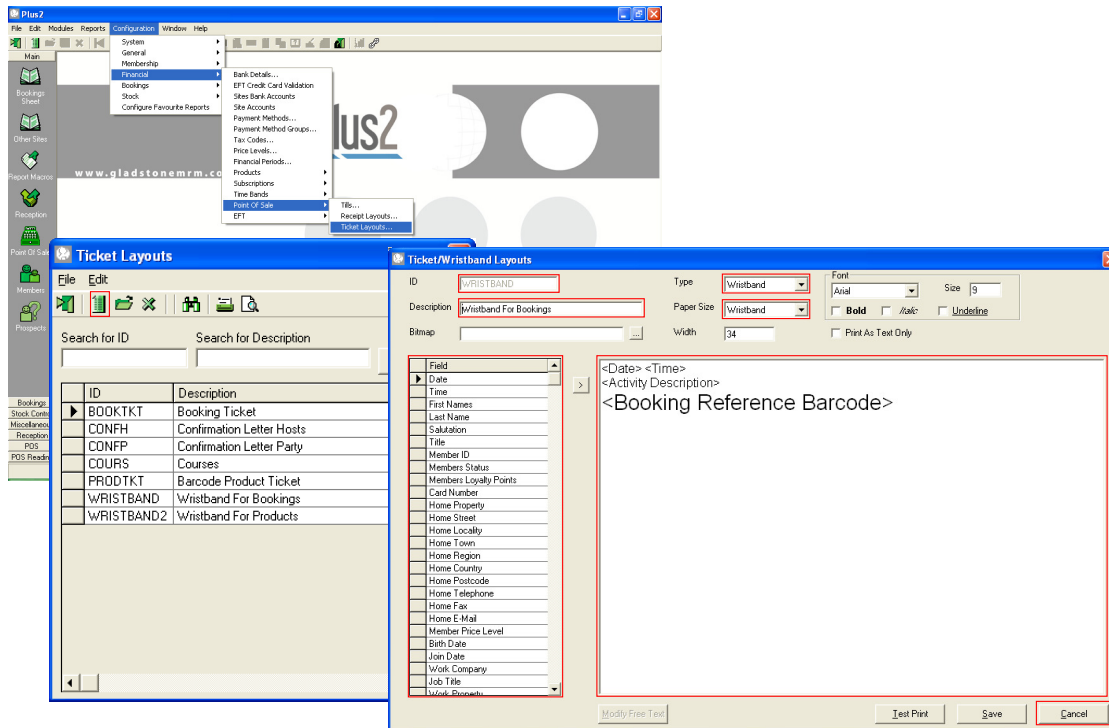

NOTES:

Ticket layouts are required if they are to be collected at the time of purchase through the kiosk.

Although existing tickets can be used, separate ticket layouts should be configured for the purchase of products and for bookable activities, due to the different content of the ticket layout.

- Choose the menu option 'Configuration', select 'Financial', 'Point of Sale' and choose 'Ticket Layouts'.
- Click on the toolbar option 'New'.
- Define a unique 'ID' and 'Description'.
- Select the 'Type' and choose 'Tickets' from the drop down list.
- Select the 'Paper Size' and choose 'Receipt' from the drop down list.
- Define the layout in the ticket layout area, using a combination of free text and fields from the list.
- Select from the field list the 'Booking Reference Barcode' if a booking barcode is to be printed.
- Once the ticket is defined, select 'Save' and you return to the list of ticket layouts.
- Select the toolbar option of 'Exit'.

6. Configure wristband layouts

NOTES:

Wristband layouts are required if they are to be collected at the time of purchase through the kiosk.

Similar to ticket layout, separate wristband layouts should be configured for the purchase of products and for booking activities, due to the different content of the ticket layout. Generic tickets can be configured for all products or bookable activities, or they can be configured specifically.

- Choose the menu option 'Configuration', select 'Financial', 'Point of Sale' and click 'Ticket Layouts'.
- Click on the toolbar option of 'New'.
- Define a unique 'ID' and 'Description'.
- Select the 'Type', choose 'Wristband' from the drop down list and the 'Paper Size' will change to 'Wristband'.
- Define the content in the ticket layout area, using a combination of free text and fields from the list.
- The font and size can be changed in wristband layout, click in the text and change the font and/or size.
- Select from the field list the 'Booking Reference Barcode' if a booking barcode is to be printed.
- Once the ticket is defined, select 'Save' and you return to the list of ticket layouts.
- Select the toolbar option of 'Exit'.
