

Plus2 9.5.16 Release Notes

Enhancements

Bookings PDR 6516

Pay for bookings invoices by entering the invoice ID
If the invoice ID is known it is possible to search for the unpaid sale in the Bookings Enquiry screen, and select to pay it through Point Of Sale.

PDR 15126

Usage subscriptions to be used on certain days only
When the calendar behind a usage subscription is configured for use on certain days of the week only, the system will now not allow its use against a booking on any other day.

Point Of Sale PDR 15030

Print a barcode on product tickets
It is now possible to configure a ticket to print a unique barcode for the sale of a product that can be used to gain access at an entry point.

Current limitation: The access control on the Entry Point depends on a printed product ticket being used and does not infringe when using a membership card.

Subscriptions PDR 15019

Accumulated usages on subscriptions that are configured to automatically renew
There is an additional check box available to accumulate usages on automatic renewal if the subscription is set with a maximum usage. When the subscription is rolled forward or renewed the system checks the usages remaining and adds them to the maximum usage configured for that subscription.

System PDR 14700

Additional user password controls
Passwords can be set to have a minimum length of up to eight characters. The system can be set to lock the User Account after a specific number of login failures.

Plus2 9.5.16 Release Notes

- PDR 7616** **The length of some of the home and work address fields has been increased**
The Property name, Street and Locality fields have been increased from 25 characters to 74, to accommodate details entered through Online Registration and Connect2.
- PDR 15073** **Prevent duplicate Plus2 users login**
There is a new General Settings system configuration to 'Allow Duplicate Plus2 user logins' that defaults to Yes. This can be set to No to prevent the same user from logging in on a second PC.
- PDR 14859** **Civica online authorisation interface for Connect2**
There is now an additional online authorisation interface of Civica available in the Connect system configuration that is compatible with release 02.04 of Connect2.
- PDR 15129** **Postcode lookup using Post Office Data**
Plus2 can now use Post Office Data as the Postcode Lookup System.
