

ABOUT **pocket**

Plus2 **pocket** is a simple and flexible off-line handheld point of sale and attendance recording solution.

The mobile device can be used anywhere to validate membership and complete sales; **pocket** extends the customer interface beyond reception. When the handheld device is docked it simply uploads the captured transactions to the database of Plus2 as though the whole process was completed at front of house.

WHY **pocket**

For the first time you can extend your Plus2 system to mobile staff and remote locations. This means that the security and accuracy of remote data collection is improved by eliminating duplication and increasing the visibility of transactions.

A single device is easily configured and can be deployed in numerous scenarios. For example, **pocket** might be used to record attendance and payments for exercise classes, ticketed events, golf courses and outdoor education activities.

pocket

YOUR pocket

*The unique character and flexibility of **pocket** means you can take advantage of the functionality in a multitude of ways; the boundaries of pocket are only set by your imagination.*

Imagine the impact of using a single mobile solution to manage a variety of activities across your business.

- Check memberships and take payments for exercise classes at the community centre
- Collect green fees and attendance at the golf club
- Apply appropriate concessionary rates at the boating lake and tennis courts
- Record attendance for the coaching session or summer camp
